ABOUT ME

Aspiring Artificial Intelligence Engineer with hands-on experience in Machine Learning, Deep Learning, LLM, and Computer Vision through my internship at Hyperlink Infosystem. Skilled in building data-driven and scalable AI solutions using Python, FastAPI, YOLO, and OpenCV. Proficient in predictive modeling, data analysis, and real-time inference, with additional experience in full-stack development using React.js and Node.js for end-to-end application deployment. Passionate about solving real-world problems through efficient and innovative AI systems.

EDUCATION

TOPS TECHNOLOGIES

Data Science

2026-Present

LJ INSTITUTE OF COMPUTER APPLICATION

Master of Science in Information Technology (MSc IT)

2024-2026

LJ INSTITUTE OF COMPUTER APPLICATION

Bachelor of Science in Information Technology (BSc IT)

2021-2024

SKILL

Prog-Language	Database & tools	Framework & Library	AI,Data Science	Soft Skills
- Python - C# - C/C++	- SQL - MongoDB - Postman - Git & GitHub	- MERN-Stack - Numpy - Pandas - Matplotlib & seaborn - FastApi - Asp-dotnet	- Machine Learning - Deep Learning - Computer Vision (yolo,opencv) - Large Language Models (LLMs)	- Quick Adaptability - Problem solving - Team Management - Content delivery - Good Leadership

WORK EXPERIENCE

Hyperlink Infosystem

AI/ML Intern

JANUARY 2026-PRESENT

- Worked as an AI/ML Intern, gaining hands-on experience in Machine Learning, Deep Learning, and Computer Vision. Developed data-driven solutions using Python, NumPy, Pandas, and Scikit-learn, and implemented real-time object detection using YOLO and OpenCV. Built and integrated scalable APIs using FastAPI for model deployment, and explored Large Language Models (LLMs) for intelligent applications, contributing to end-to-end AI system development.

LJICA

Visiting Faculty

JANUARY 2025

- Conducted ASP.NET MVC sessions as Visiting Faculty at LJICA in January 2025, focusing on web development using the MVC architecture. Delivered simplified, interactive lectures with real-world examples and hands-on projects. Designed structured lesson plans and assessed student performance through discussions, evaluations, and feedback to strengthen their ASP.NET MVC skills.

Visiting Faculty

- Conducted Django sessions as Visiting Faculty at LJSCA in July 2024, focusing on backend development. Delivered practical, engaging lectures with real-world applications and live coding. Created structured lesson plans, integrated hands-on projects, and evaluated student progress through quizzes and feedback to strengthen their conceptual understanding of Django.

IN-HOUSE PROJECTS

NeuroHire – AI-Based Recruitment System

APRIL 2026

Neurohire

- Developed an AI-based resume screening system using NLP and Machine Learning to automate candidate evaluation. Applied text processing, feature engineering, and semantic matching techniques to rank resumes against job descriptions. Built scalable backend APIs and improved recruitment efficiency through intelligent automation.

SKILLSWAP(MEAN Stack)

APRIL 2025

SKILLSWAP

- "Co-developed SkillSwap, a MEAN stack app for peer-to-peer skill exchange. Implemented JWT & Google OAuth 2.0, real-time chat with Socket.io, and role-based access. Built a responsive UI with Angular Material & Tailwind CSS, supporting skill listings, exchanges, certification uploads, and collaborative features."

Real-Time Employee Tracking System

MARCH 2026

Employee Tracker

- Built a real-time employee tracking system using Computer Vision with OpenCV and YOLO for person detection and activity monitoring. Designed a video processing pipeline to track employee presence, detect absence based on time thresholds, and provide real-time insights through a web-based dashboard. Integrated backend APIs for scalable monitoring and data handling.

RESEARCH AND CERTIFICATES

Metaverse Demystified

FEBRUARY-2025

Published in JSMS (Journal of Scientific & Management Studies).

- Published a research paper on the Metaverse, focusing on its architecture, enabling technologies, and real-world applications. Analyzed key components such as AI, Computer Vision, XR, and blockchain, along with challenges related to security, privacy, and scalability in virtual environments.
